Can We Be Sure That God Exists

David Banning · 1 Peter 3:15 · Series: **Belief**

INTRODUCTION

- You and I, as God's children, need to be busy spreading the gospel of Jesus Christ to the lost that are around us.
- Doing the work of soul winning involves answering questions, doesn't it?
- Sanctify Christ as Lord in your hearts, always being ready to make a defense to everyone who asks you to give an account for the hope that is in you, yet with gentleness and reverence.

1 People's Foundations Are Changing

- Can we be sure that God exists?
- I'm convinced, brethren, that what's happening in our country is that people's foundations are changing.
- What our children are fed is a diet of skepticism.
- I don't think they've made us a society of atheists. But I do think they've created a culture of people with foundation problems.
- The evidence for God's existence is so overwhelming and irrefutable that one has to be irrational not to believe in him.

2 The Design of the Creation

- The first piece of evidence we need to look at is the design of the creation that is all around us.
- It moves around that great fireball that we call the sun, just perfectly distanced from it so as to provide the exact amount of heat and light that is needed in order to sustain life.
- Even within your own body, right this minute, there are countless little, delicately balanced systems that are working to keep you alive.
- There are only two options which one can believe about that. Either we conclude that all of this just happened to work out this way, some kind of grand cosmic accident, or someone designed it to be this way.
- Plain old common sense tells us that when we see design, there has to be intelligence behind it.
- People tell us that something far more amazing and complicated, like the human brain, has just somehow evolved, and people find that reasonable?
